RE: Sampling Inspection NPDES# TN0022993

Mr. Hall,

This letter is in reference to the inspection that took place at our wastewater treatment plant on February 9 2012.

**Item 1: Upgrades** – Internet and computer installation at wastewater plant has been approved.

**Item 2: Upcoming Projects**- This year we plan to drain and remove sludge from bottom of aeration basin and check tank for repairs. In addition, we are looking to put in new diffusers in aeration basin and digester.

**Item 3: Repair/Maintenance** - We are currently in the process of painting the tanks as well as installing new hand rails on the grit chamber, chlorine basin, and clarifiers.

**Item 4: Collection System** - Plans to install new alarm system with telemetry which will be used to monitor wet walls alarms and pump stack run with times.

**Item 5: Outlook** - Talked with Dan Martin (Taud) about options.

Respectfully,

A handwritten signature in cursive script, appearing to read 'Sabra Hodge', is written over the typed name.
